

NPA 09/16

SUBJECT: AP63468 Engine Oil Cooler Kit and AP0041 Engine Oil Cooler Installation Kit

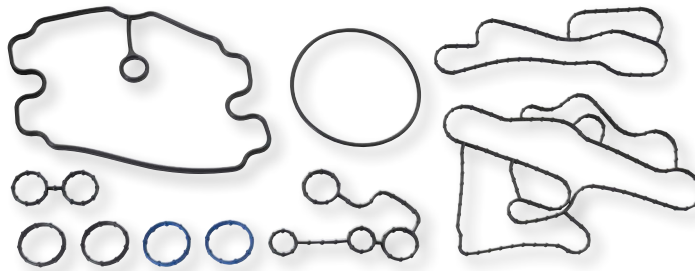

August 30, 2016

Alliant Power is pleased to announce the release of **AP63468** Engine Oil Cooler Kit and **AP0041** Engine Oil Cooler Installation Kit for the Ford® and Navistar® applications listed in the table below. These kits come with all necessary seals required for installation. AP63468 includes the engine oil cooler with installation kit. The installation kit is also available separately as AP0041.

The turbocharger must be removed in order to access the oil cooler. For this reason, Alliant Power recommends the use of **AP63482** or **AP63483** Turbo Installation Kits when installing or reinstalling the engine oil cooler. Specific application information can be found on [NPA 02/15](#) and [NPA 03/15](#).

AP63468

AP0041
