

NPA 16/17

SUBJECT: 6.6L LML Duramax® Head Gasket Kits

August 16, 2017

Alliant Power is pleased to announce the release of **AP0154** and **AP0155** Head Gasket Kits for the 6.6L LML Duramax. These kits include all the necessary seals and gaskets to install the cylinder heads and can be purchased with the head studs to replace the factory cylinder head bolts. These applications utilize different thicknesses of head gaskets therefore the head gaskets themselves are not included in these kits and must be ordered separately. See Alliant Power Technical Bulletin [APTB 11/11 R1](#) for proper head gasket identification and to obtain the proper Alliant Power head gasket part number.
