

NPA 23/17

**SUBJECT: PurePower Technologies® New G2.9 Injectors
October 31, 2017**

Alliant Power is pleased to announce the release of brand new PurePower Technologies (PPT) G2.9 Injectors for the Navistar® applications found in the table below.

Replacement of G2.9 Injectors requires removal of the high–pressure oil rail. The injector inlet seals are incorporated on the oil rail and must be replaced prior to reinstalling. Alliant Power kit **AP0025** provides the necessary seals and backup rings to reseal the rail properly. For further information refer to [APT03/10](#)

New G2.9 injectors are backed by Alliant Power’s 13–month, unlimited mileage warranty, as well as Alliant Power’s professional technical support.
