

Job Description

Company Name is currently accepting applications for a full-time **FIE Technician**. This position is responsible for the repair of various types of diesel pumps, injectors and turbos according to current level of training and ability.

Key Responsibilities:

- Tear down/repair/testing of various types of diesel pumps, injectors and turbos in accordance with company and manufacturer recommended policies and practices.
- Acquisition of needed parts from warehouse personnel.
- Correct and safe operation of customary hand/power tools used in diesel repair.
- Complete required work order documentation.
- Continuing education as needed/approved to maintain effective service.
- Follow all industry safety regulations.
- Operate in conformance with the requirements of the Company Name quality management system.
- Assist other employees both in and out of the department.
- Perform other related duties and assignments as required.
- Provide feedback on system needs/changes.

Requirements:

Comprehension of diesel engine mechanics. Two-year technical college training in heavy- duty diesel mechanics (or comparable training) desirable. Good analytical and problem-solving skills. Regular attendance is an essential requirement. Must have ability to lift up to fifty pounds on a regular basis. Some positions may require specialized education/training as determined by management.
