For fitment verification please contact Techsupport@alliantpower.com with equipment serial number or complete VIN number.

FEATURES & BENEFITS:

- **Alliant Power Remanufactured Turbo Actuator for the Paccar MX11/13 is constructed from the highest quality components and rebuilt to OEM standards.**
- **Direct Fit:** Actuator designed to fit your vehicle seamlessly without the need for modifications or additional components. This ensures a hassle-free installation process.
- **OEM Quality:** This actuator is built to meet or exceed original equipment manufacturer (OEM) standards. This means that it's manufactured with high-quality materials and craftsmanship, ensuring durability and reliable performance.
- **Install Kit Included:** Alliant Power Actuators come with all the necessary components and hardware required for installation.
- **Remanufactured for Cost Savings:** Alliant Power Actuators are typically more cost-effective than brand new ones while still maintaining high-quality standards. This allows you to save money without compromising on performance or reliability.
- **Two-Year Warranty:** Every Alliant Power Reman Actuator is backed by our two-year warranty.
- This actuator will require calibration to complete the re-installation. Calibration can be performed with any standard, capable tool including Cummins INSITE, Holset E-Tool, and various Snap-On, Matco, and Autel tools.
