

SUBJECT: Cummins® and Bosch® Interchangeable Dosers

Bosch has four interchangeable dosers which fit various Cummins engines. We have determined the mounting gasket provided from Bosch (F 00B H20 165) may or may not be the correct gasket. Depending on the ESN it may need the Cummins 4329681 mounting gasket and the supplied Bosch mounting gasket must be discarded. The other noticeable difference is the material of the DEF inlet fitting, some may be plastic or a metal fitting. See the table below for the contents of each individual part number.

Bosch part number	Cummins part number	Mounting gasket	Plastic fitting	Metal fitting
0 444 043 008	2880156, 2871878	X	X	
0 444 043 017	2888112, 2888173	X		X
0 444 043 031	2888112, 2888173		X	
0 444 043 033	2888112, 2888173			X

Note: Images below are of the dosers in the order of 0 444 043 008/017/031/033 (from left to right).
