Part Number	Description	Engine Year	Engine Manufacturer	Engine Model	OEM Cross Reference
AP0205	Turbo Install Kit	2005-2019	Hino	J08E (ND,NE,NJ,NV)	S040010442

### FEATURES & BENEFITS:

This Alliant Power Turbo Installation kit has been developed to combat the lack of availability in the market. The OEM installation kit can only be purchased from Hino dealers and there are no aftermarket options available. This is a complete solution ensuring that you have everything you need to replace your factory turbo.

- **Precision Fit:** Every Alliant Power Turbo Install Kit is engineered to match the exact specifications of your vehicle's turbocharger system. This precision fit ensures a tight and secure seal, minimizing the risk of leaks.
- **Quality Materials:** This kit is made from high-quality OEM equivalent components that are durable and resistant to heat, pressure, and corrosion. This durability ensures a longer lifespan.
- **Enhanced Performance:** A proper seal provided by the Alliant Power Turbo Install Kit can help optimize turbocharger performance. It prevents the loss of exhaust gases, ensuring that they are directed through the turbine wheel for improved power and efficiency.
- **Reduced Emissions:** A secure seal with these gaskets helps maintain proper emissions control by preventing the escape of exhaust gases before they pass through the catalytic converter. This contributes to lower emissions levels and compliance with environmental regulations.
- **Ease of Installation:** The Alliant Power Turbo Install Kit is the most complete offering on the market. Ensures no other product will be needed when servicing or replacing your turbo.
