For fitment verification please contact Techsupport@alliantpower.com with equipment serial number or complete VIN number.

FEATURES & BENEFITS:

- **Direct Fit Design:** Installs seamlessly, no modifications needed.
- **Pre-Calibrated Actuator:** Optimizes performance, efficiency, and emissions for immediate power gains.
- **Reliability and Durability:** Meets or exceeds OEM standards for reliable durability.
- **Market Demand:** The L5P engine is one of the most popular Light Duty Truck engines. Used in the Chevrolet Silverado and GMC Sierra, which have a significant presence in the US. Offering replacement turbochargers for these vehicles as they age out of the OEM warranty creates substantial opportunity for sales potential.
- **1-year warranty & new, no core unit:** Confidence & convenience guaranteed.

PRODUCT DESCRIPTION:

Crafted with precision engineering and built to OEM specifications, the DTech Turbo for the 2017-2019 GM 6.6L L5P Duramax guarantees durability and longevity, so you can hit the road with confidence mile after mile.

Designed to fit seamlessly into 2017-2019 model years, installation is a breeze with a direct-fit design, ensuring compatibility and hassle-free integration with your vehicle's OEM equipment. Equipped with a precision-engineered, pre-calibrated actuator, this turbocharger optimizes boost control, maximizing efficiency and responsiveness across all RPM ranges.

With top-tier quality assurance and customer support, along with a 1-year warranty, this DTech Turbo is the optimal choice when replacing your factory turbo.
